EDUCATION

James Madison University (JMU), Harrisonburg, VA

Expected Graduation: Dec 2025

Bachelor of Science in Computer Science and Business Ethics, Minors in General Business and Logic and Reasoning

Projects

MorningBrief - Productivity Web Application

Fall 2024

- Engineered a web application that consolidates key info including weather forecasts and calendar events, reducing user distractions and boosting efficiency by eliminating unwanted ads and irrelevant content.
- Designed using HTML, JavaScript, and CSS for functionality across web and mobile devices.
- Integrated real-time data using Google Calendar and Visual Crossing weather APIs, showcasing advanced API handling and dynamic content updates.

Financial Management and Stock Tracking Application

In progress - Fall 2024

- Constructing a comprehensive financial management web app featuring expense tracking, budget planning, and investment logging, enhancing user capability for organized financial oversight.
- Utilizing responsive design principles with Bootstrap containers for optimal desktop usability, ensuring a user-centric interface across varying screen sizes.
- Incorporating AdminKit pie charts for visual spending analysis, demonstrating strong data visualization skills to support informed financial decisions.

Skills

Languages: Java, Python, HTML, CSS, JavaScript, C

Relevant Coursework: Application Development, Algorithms and Data Structures, Software Engineering, Advanced Programming, Discrete Structures I, Discrete Structures II (current), Computer Systems I (current), Accounting, Computer Information Systems, Microeconomics, Finance, Management, Marketing (current), Ethical Reasoning
